DECISION AUDIT · FOR COMPANIES

# Find out what's holding back your website or product.

I go through your website or product as a customer and record a narrated video. You'll see where people get stuck, and you'll get a list of what to fix first.

**RIGHT FOR YOU IF**

- you sense the website isn't working, but the team can't agree why,
- the website was built fast, maybe with AI, and you want to check what it decided for you,
- you're an agency and need an independent outside view for a client.

## WHAT YOU GET

### A narrated video
One for each page or journey. Watch it with your whole team.

### A prioritized list
What isn't working, in the order I'd fix it.

### A recommendation
Who should fix it: me, a new hire, or no one.

### A call about the results
30 minutes, if you want one.

## PRICE

**From €1,900**
**excl. VAT**

1 product in 5 business days

The price depends on how many pages and journeys I review, and whether on desktop, mobile, or both. After a first look, I'll send a quote broken down by item. Cross out what you don't need, and the price updates.

**What affects the price** Number of pages and journeys

Desktop, mobile, or both

## WHY EXTERNAL, AND WHY ME

### An outside view
I don't belong to any department and I don't defend a budget or a system. I ask the questions nobody asks internally.

### 13 years of practice
Banking, energy, healthcare, and crypto. I cut most options that won't pass compliance or engineering before anyone draws them.

### Something you can click
A prototype, a recording, or a design system with real content and states, not a diagram for the wall.

### Decisions with a record
I write down every decision with its reason, so nobody has to reopen it.

## HOW IT WORKS

**1**
### Scope
We agree on what I review. I go through single pages top to bottom. On a large website, I follow conversion journeys, from an ad or a button to a submitted form. Each item separately on desktop and mobile.

**2**
### Access
Send me access and a few sentences about what's bothering you.

**3**
### Walkthrough
I go through the website as a customer and record what I see. I don't submit forms or log in to customer accounts.

**4**
### Handover
You get the videos and the list of findings. If you want, we go through the results in a 30-minute call.

One product takes 5 business days. A larger scope depends on the number of items and on when I get access.

## EXAMPLE SCOPE

A company with 2 brands. The quote had 9 items, each priced separately for desktop and mobile, so the company could pick just a part.

| PART | HOW I REVIEW IT | DEVICES |
|---|---|---|
| 3 landing pages | Each page top to bottom | Desktop and mobile |
| The second brand's website | 6 conversion journeys, from entry to a submitted form | Desktop and mobile |

## WHAT'S NOT INCLUDED

- A workshop.
- Submitting forms or working in customer accounts after login.
- Analysis of ad campaigns and analytics data. I use data as context, not as the subject of the audit.
- Designing a new solution. A Decision Prototype or an App Facelift can follow the audit.

## IN PRACTICE

**WPP** · An express campaign audit

A campaign audit on desktop and mobile before launch. The campaign was fixed before it went out.

**Leeaf** · Auditing the path to subscription

17 changes and a tracking plan across 3 screens.

## NEXT STEP

Write to me and we'll set up a free 30-minute call. We'll find out whether an audit will help you and what it should cover.
